SPEAKER SHEET

Building strong, *resilient* product teams.

Sabrina Jackson is Vice President of Product at Duetto, the revenue and profit operating system for hotels, resorts and casinos, where she leads a team of product leaders and acts as the glue across a 50-person product organization. Over nine years she has helped scale Duetto through 8x ARR growth, leading product through a pandemic that shut down most of its market, a major restructuring, and the shift to AI-native product development. She presents product strategy to Duetto's board, serves as acting CPO, and was a key product leader on the company's third acquisition. Sabrina is known for building strong, resilient product teams, and for candid talks on what product leadership looks like under pressure.

Talks

KEYNOTE · 30-45 MIN · CPO SUMMIT BOSTON 2026

Built for the *pressure*

Why the winners won't be the companies with the most AI, but the ones with the clearest priorities and the strongest people leadership. Three moves for leading under pressure, and how to use AI to buy back bandwidth for the human side of the job.

WORKSHOP · 40-90 MIN · DUETTO LEVEL UP LABS 2026

Public speaking isn't the stage. *It's every meeting you're in.*

A practical, interactive session on speaking up with confidence, from the all-hands to the one-on-one: one idea per talk, a four-beat structure, delivery on video, and managing nerves.

KEYNOTE, PANEL OR FIRESIDE · 20-45 MIN

Say no more than yes

When AI makes building cheap, the scarce skill is knowing what not to build. How product leaders become the layer that pressure-tests ideas before they reach the team.

What attendees said

"Your point about handing off a roadmap that's already out of date the moment GTM gets it hit home."

Product, data and engineering leader ·
CPO Summit 2026

"I really appreciated your candid example on the realities of needing to ship an MVP directly to production under pressure."

Innovation consulting director · CPO
